REISSUE APPLICATION DECLARATION BY THE ASSIGNEEDocket Number (Optional)

At least one error upon which reissue is based is described as follows:

This is a broadening reissue. Applicant claimed less than he had a right to claim by limiting independent method claim 1 to a dosing pellet magazine rather than also including a single loaded dosing device, as described in the specification. Accordingly, applicant has added new claims 18-29, which are analogous to claims 1-14 and 17 except that the new claims refer to a single see through pellet dosing syringe body while the original claims are for a dosing pellet magazine. "Cattle" in claims 3 and 11 is too limiting in view of the specification and is replaced with a broader group consisting of eight animals. Claims 4 and 12 are ambiguous and are clarified by the addition of "by weight." Claim 6 is overly restrictive in view of the specification and is broadened by expanding the range of lubricant in the pellet. Claim 7 is ambiguous and is clarified by the addition of "by weight." "Gentamicin" in claim 8 is too limiting in view of the specification and is replaced with a group consisting of eight antibiotics. Claim 9 is ambiguous and is clarified in that it is "for use in inoculating an animal." New claim 17 depends from claim 1 and specifies areas for pellet implantation.

[Attach additional sheets, if needed.]

All errors corrected in this reissue application arose without any deceptive intention on the part of the applicant.

I hereby appoint the following attorney(s) and/or agent(s) to prosecute this application and transact all business in the United States Patent and Trademark Office connected therewith.
